

## TELECOM SAVINGS

In today's fast paced, stay in touch environment, telecommunications expenses for the enterprise account for one of the five largest expenses of most corporations. With the advent of new services and technologies these costs have quickly become the most difficult to manage. The lack of trained professionals within the organization, and the ever-growing need to

trim IT and accounting budgets only compound this problem.

Telmetriks unique and comprehensive approach enables improved Telecom Expense Management by identifying problems in a proactive manner. Our systematic techniques begin analyzing potential errors or undesirable usage patterns as soon as the user makes a call. This, coupled with our Audit and Optimization practice, ensures that you're organization is being billed correctly and that those services are genuinely needed.

### Process Methodology

## FREE TELECOM ASSESSEMENT

Telmetriks will perform a no-risk Telecom assessment for your organization, outlining your true price points and financial inventory. Upon completion of this assessment, we will provide a free Cost Component Database for your records.

To validate your current situation, Telmetriks will analyze your contracts and inventory and provide an Optimization report describing the savings that could be achieved by employing our services. It is now your choice to have us generate the savings for your organization on a contingency basis.

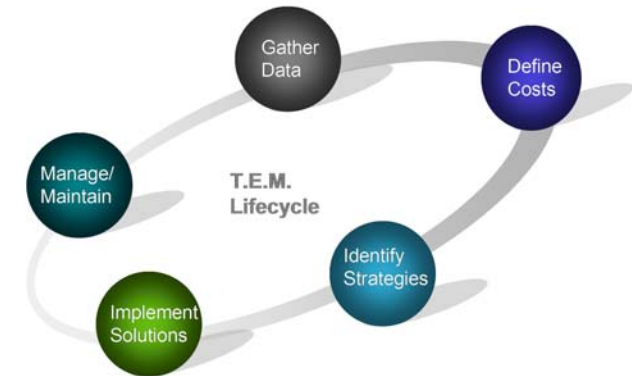

We analyze all components of your telecom spend including:

Local-LD-Conference-Calling Card-Data-Internet-Cellular-VoIP-and Maintenance Agreements

It is our hope that after the initial engagement we would have shown the value of our services to your organization. It is at this time, we will provide a quote for monthly management of your Telecom Expenses.

Try us out...after all, what do you have to lose, besides those huge Telecom expenses!

## OUR METHODOLOGY

1. We compile the Inventory from your most recent 3 months Invoices, Contracts, CSR's and customer databases. Costs are defined against contracted rates and matched to actual invoices for accuracy.
2. We provide a Free Telecom Assessment of your current spend and develop a Cost Component Database (CCD) for your records.
3. The optimal configuration of both contracts and services are identified. We present the findings to your organization via our detailed Optimization Report.
4. Upon approval, we implement the specified recommendations.
5. After we have proven ourselves, We then discuss managing your organizations needs on a go forward basis to ensure optimization
